BUILT FOR THOSE WHO

When you work in the skilled trades, you leave your mark on every job you touch. Your reputation is built over time. Day by day, job by job.

When it's your name on the line, make sure our name is on your tool. For nearly 100 years, we've built our legacy the same way you have — one job at a time. We make tools that stand up to the toughest challenges and last long enough for you to pass them down to the next generation. We deliver a better way to work.

It's more than our promise. We guarantee it.

PRESS CONFIDENTLY. PRESS WITH THE BEST.

RIDGID[®] press tools save you time and money by delivering reliable performance press after press. Every generation of press tools works harder – and smarter – than the last. We are constantly working to reduce in-use tool weight while increasing overall performance. That's why we are the #1 press tool manufacturer since 1999. RIDGID: BUILT FOR THOSE WHO KNOW.™

PRESS CONNECTIONS ON A "WET" SYSTEM.

LOWER TOTAL INSTALLATION COST.

CONNECTIONS IN 5

SECONDS OR LESS.

REDUCES VITAL EQUIPMENT SHUTDOWNS.

NO BURN PERMITS. NO ONSITE FIRE WATCH.

#1 IN NORTH AMERICA

RIDGID[®] revolutionized the North American Market by introducing press technology in 1999. Since that time, RIDGID has become the most recognizable and trusted brand for press tools. To this day, the RP 340 stands as the number #1 selling press tool in North America.

TESTED UNDER PRESSURE.

RIDGID tools are tested under the toughest conditions to ensure that each tool will work properly in any environment. RIDGID designers, testers and engineers work closely with Viega[®] the global leader in press fittings, to deliver secure connections with every press. RIDGID press tools stand up to every test in the field because they've already passed the hardest ones in the lab.

CHANGING THE GAME.

RIDGID® is the top press tool in North America due to constant innovation. It introduced the first lithium ion battery for pressing, the first soil pipe cutter actuated by a press tool, the first tools for pressing iron pipe and the first power tool specifically designed to press PEX copper ring systems. Most recently, RIDGID introduced its Press Booster for use with Viega® MegaPress® XL fittings, the first tool able to press steel pipe $2\frac{1}{2}$ " to 4".

SMALLER. FASTER. SMARTER.

Today, every generation of RIDGID press tools works harder and smarter than the last. The RP 340, for example, is nearly half the weight of its original predecessor. The RP 240 and RP 241 are more than two pounds lighter than the RP 100B, the original compact press tool. Current models also come equipped with Bluetooth® compatibility, so the tools can interface with RIDGID Link, an app that tracks tool performance, tells you where the tool was last seen and delivers helpful service reminders among other features. RIDGID Link easily interfaces with both iOS and Android phones and tablets.

THE BEST NEVER REST.

With more than 100 patents already secured and more on the way, RIDGID[®] continues to deliver a better way to work. Every press tool, jaw or ring is purpose-built based on feedback from the field. This history of field-driven innovation - coupled with the industry's best lifetime warranty – makes RIDGID the most trusted brand for trade professionals all around the world.
